EDIE VALENCIA JOINS QMC TEAM

Pittsburgh (*January 15, 2010*) — Edie Valencia joined Quick Med Claims (QMC) as the Corporate Trainer in early December of 2009. Ms. Valencia will have primary responsibility for developing and delivering educational programs for the QMC staff and serve as a resource to Clients in the areas of education, training, software applications and financial reporting. The training will include programming focused on the fundamentals of claims processing, clinical documentation requirements, customer service, enhanced claims processing tools, leadership development, patient relations, payor relations, and regulatory compliance. Her work with Clients will focus on performance improvement opportunities related to software, system integration and the billing process.

“QMC has experienced steady growth in recent years” according to Chief Executive Officer Harry Sichi. “This evolution has created increased demand for personnel and resulted in substantially more demand for training.” In her role as Corporate Trainer, Ms. Valencia will assume primary responsibility for initial employee orientation and training as well as the ongoing effort to provide continuing education for the existing staff. She will also coordinate the application of external educational resources that are available to the QMC staff.

Ms. Valencia brings a wealth of knowledge relative to the ZOLL RescueNet Billing software and the broader ZOLL family of software products. Her expertise will allow QMC to do even more system customization on behalf of its Clients within the billing software. Her knowledge of the software will facilitate advanced report capabilities in line with Client business objectives. Ms. Valencia has a great deal of experience with system integration efforts and will work with the IT Team to assist Clients with such projects. Clients will benefit from her substantial experience as they seek to maximize the effectiveness of the ZOLL software beyond the billing application.

“Ms. Valencia comes to our organization with formal training in the software disciplines, and a wealth of practical experience” says Michael Lewis, the President of QMC. “Her extensive experience with ZOLL software products provides an additional resource to the organization.” Ms. Valencia is currently revising the employee orientation program and planning for the 2010 educational needs of the organization. In addition, she is already actively involved in a number of Client projects.

Prior to joining the QMC team, Ms. Valencia spent five (5) years at ZOLL (formerly ZOLL Data Systems) handling software installation, configuration and staff training. In addition, she has experience as the Billing Manager for a private ambulance operation. “I am delighted to be a part of the organization” says Ms. Valencia. “I have worked with QMC for many years and always found the staff to be among the most dedicated.”
